Danske Invest

Finland Opportunities D (AIF) (FI4000081351)

This fund is managed by Danske Invest Fund Management Ltd, part of the Danske Bank group.

Objectives and investment policy

Objectives

The target of investment activities is, through active asset management and pursuant to the Act on Common Funds and the regulations, to achieve a return that exceeds the return of the benchmark index.

Investment policy

The assets are invested in publicly traded equities whose issuer is a company that is Finnish, operates in Finland, is listed in Finland or is highly dependent on the Finnish economy. The fund is a non-UCITS that deviates from ordinary mutual funds under the Finnish Act on Common Funds in that the fund's investment strategy, as specified in its regulations, can be less diversified than in an ordinary mutual fund. The fund focuses its investments on a limited number of companies, taking risk diversification principles into account. The fund's assets are typically invested in shares of 15-25 companies. The returns on the

fund's investments, such as dividends and interest, will be reinvested. The fund's base currency is the euro.

The fund is suitable for investors who want to invest in the shares of Finnish companies, and who seek high returns, while tolerating substantial value fluctuations or even decreases. The fund is suitable as part of a diversified investment portfolio. As a result of the concentrated investment universe of the fund, its 'Active share' -figure may be low. Investors may subscribe for and redeem fund units on every banking day.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Benchmark

OMX Helsinki Cap -indeksi.

Risk and reward profile

The fund is categorized as 6. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant

and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, market risk and risk related to investment style or investment area (e.g. funds with more concentrated portfolios). As the fund will invest its assets in the equity markets, the value of the fund may fluctuate according to market conditions.

For further details about risk, please refer to the following section in the fund prospectus: "Principal risks of mutual funds."

General trading terms

Orders regarding fund units can be submitted in the manner specified in the section of the fund's regulations entitled "Subscription, redemption and switch of fund units".

Based on their return distribution, fund units are divided into either distribution units or growth units. No return is distributed on growth units; instead, all returns are reinvested in the fund to increase the value of the growth units. In contrast, the aim is that return is distributed annually on distribution units.
